HOW DATA FLOWS

HQ dashboard: unanswered questions become new docs & glossary terms

HQ PREPROCESSING

LLMs read every document once, so the field never has to.

Hypothetical questions

Image → text

Scanned reports and handwritten notes

Multilingual

Importance

Clinical guidelines outrank press releases.

Evidence trail

Each guideline linked to MSF research on the same question.

SEARCH MODE · any device

Find the document

Keyword + concept match · ranked passages · confidence score, and opens the PDF at the right page

CHAT MODE · kit laptop

Get the answer

Small open LLM rephrases retrieved passages only · every sentence links to [1] [2] sources

SMS MODE · basic phone

Text a question

Field profiles Surgeon · trauma | Nurse · cholera | Midwife · maternal | Doctor · malnutrition | MHPSS · displacement

→ role-relevant docs ranked higher

SAFETY IN A MEDICAL SETTING

AI-generated summary

Machine content is always labelled, never mixed with the source.

No reliable match · not found: bitcoin

Off-topic? No guess, and no LLM call at all.

Transcribed from scan · check original p.59

Scan / handwriting → Readable searchable + flagged

Unclear sent to HQ for review

Strong · Partial match

Confidence on every result. Weak matches hidden by default.

Effective, tiny, and free to run.
